

WE KNOW YOU HAVE ENOUGH TO WORRY ABOUT.

YOUR APPARATUS SHOULDN'T BE ONE OF THEM.

LONG ON FEATURES. SHORT ON WHEELBASE.

The long and short of it is that you get more of what helps, less of what gets in the way. The Pierce PUC is long on storage, ease, efficiency and safety, but short on hassles, headaches and wheelbase. Pierce gives you increased compartment space, a simplified two-step pump shift operation, and a big pump with foam and CAFS capabilities. Gone is the bulky pumphouse, making way for a much shorter wheelbase — as compact as 172". With more flexibility to customize your apparatus, PUC — the Pierce Ultimate Configuration — changes everything.
